SKILLS

1+ Year Web Dev

ES6+ JS (strong)

SCSS/CSS (mid/strong)

MERN Stack

Mongo (weak/mid)

Express (mid)

React (mid)

Node (mid/strong)

Git/GitHub (mid)

Firebase (mid)

UI/UX Design (mid)

HOBBIES

Film, Weightlifting, Reading
Wikipedia, Gaming

INTRODUCTION

I am currently seeking a position as a Junior Web Developer in a team that will invite room for growth as a programmer, where I will sharpen my expertise in my existing skillset, and where I can attain experience in new technologies or techniques.

COURSES

All courses were done alongside practice and thoroughly taking notes when needed.

React   39 hours   Udemy

Learning the fundamentals of React, along with Redux, the Context API, and Hooks.

Express   12 hours   Udemy

Thorough rundown of Express, background on web servers and networking, as well as some info on Mongoose and Passport.

NodeJS   34 hours   Udemy

General rundown on NodeJS, along with MongoDB, Mongoose, Express, and some minor frameworks.

RECENT PROJECTS

My Resume   React, react-pdf   GitHub

While the react-pdf is still under development, I really enjoy the customizability in creating a resume how I want it, and I can use React and CSS, which I'm more comfortable with than something like Latex.

Idle Architect   React   GitHub

An in-browser incremental/idle game based around building a team of architects and constructing great buildings. Work in progress.

Password Generator   React   GitHub

A random string/password generator, with options for customizability.
